

SPECIALIST IN THE DESIGN & MANUFACTURING OF SPECIAL MACHINES

From a promising start...

EP MECA was created by Emmanuel Pich in 2005, and now located in Veauche, Loire (42). His first goal was to answer the need of the neighbouring company SNF (The largest polyacrylamide manufacturer in the world). Within a few months, he designed a special machine, used in assisted polymer injection for petroleum, according to the current regulations. EP MECA then became indispensable to SNF; the orders are multiplying, the adventure EP MECA took a new turn.

... to the multi-services company focused on everyday innovation

From the former simple engineering office, EP MECA is nowadays a company with multiple skills to provide its clients with both design, realization in machining workshops, assembly and boilermaking, as well as installation at the customer's. Today, EP MECA offers its customers the opportunity to create the machine adapted to their needs and their requirements, according to their field of activity, respecting the standards. EP MECA likes to innovate by designing the machines of tomorrow for its customers

A large range of applications

EP MECA manufactures special machines for a wild range of activities, including :

- > Chemical & petrochemical,
- > Paper manufacturing,
- > Food industry,
- > Laboratory,
- > Cosmetic industry,
- > General mechanics,
- > Environment,
- > ...

A TOOL BOX TO MANAGE YOUR PERSONALIZED PROJECT

From a usual working method, EP MECA adapts its approach of work to offer its clients a tailor made both creative and technical solution.

Start-uppers, small companies,

Shall we work together ?

EP MECA offers personalized support to make your project come true. After analysis of a well-considered preliminary project, supported by a market study, we put at your disposal all the expertise of our teams: designer, project manager, draftsman in design office, technical teams in machining, boilermaking and assembly for the realization of prototype. We then industrialize your project in our workshops.

EXCELLENCE AS A MOTTO

EP MECA's primary and daily concern is to provide its customers with quality service. For this, EP MECA is certified:

OUR VALUES

INDUSTRIAL INNOVATION

is our every day concern. Bring you innovative solutions, high performance, creativity to answer your special needs, is our daily challenge.

A TAILORED SUPPORT

Throughout the project, our teams are at your disposal and answer your questions, to evolve the solution and stick as close to your needs.

SECURITY

For EP MECA teams, for you. We strive to ensure that our teams and customers work on high-performance machines that comply with the current regulations in the sphere of competence in which you operate.

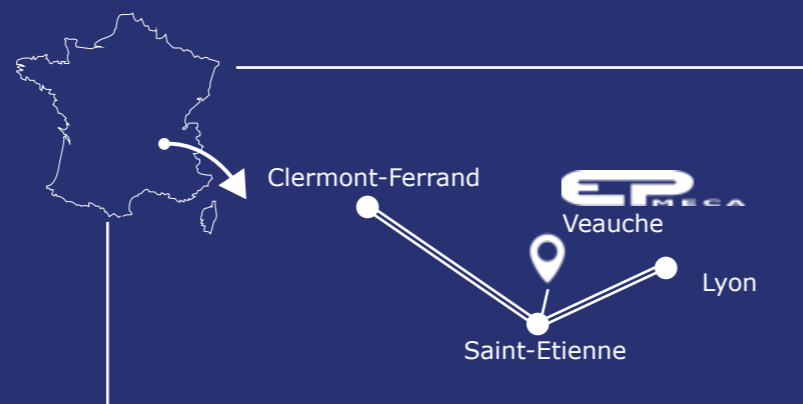

QUALITY

EP MECA certifies the quality of processes and products and guarantees it.
EP MECA is certified ISO 9001 and MASE, ASME for its boiler works.
